

SUBJECT NO.43

RC.No.372/92-G1

SUB: Anakapalli Municipality - Widening of existing ring road from 80' to 100' from GNT Road upto Railway Station - Proposals put up - Regarding.

....

The VUDA has formed the 80' ring road from GNT Road to Railway Station under IDSMT funds. Accordingly it has been marked in the sanctioned Anakapalli Zonal Development Plan. Subsequently the Market Yard proposals abutting the said 80' ring road in an area of 30.37 Acs. have come up. The Government have also agreed in principle from land use change from residential to commercial use to enable the setting up of Agricultural Market Yard vide Government letter No.1604/I2/94-1 dated 2.2.1995. The market yard have already acquired the land and the designs are under process by them. The Market yard would generate heavy traffic movement especially from G.N.T. Road to Railway Station. In order to have proper traffic flow it is necessary to widen the existing 80' ring road to 100' wide from GNT to Railway Station. Already 100' road has been proposed in the Zonal plan from 80' ring road connecting the Sabbavaram road. Once this 80' road is widened to 100' road there will be proper circulation system from Railway Station to Sabbavaram road as well as G.N.T.Road. The above proposal of widening existing 80' ring road from GNT Road to Railway Station may please be approved to take necessary action for incorporation in the sanctioned Zonal Development Plan by issuing the public notification as required under section-12 and sub-sec.3 of A.P.Urban Areas (Development Act, 1975.
